Database Scenarios

Here is the list of database design scenarios. Find the actual scenarios in the project companion zip file. Choose two, your teams first and second choice as soon as you can. And forward this request to Nicholas (nicholas.hodder@keyin.com) and Peter (peter.rawsthorne@keyin.com). We do not want any two teams doing the same scenario. Therefore, first come first served. The companion zip file contains all the written scenarios.

File Name	Scenario name	Business Theme
